

OPTIONAL ACCESSORIES

REMOTE CONTROL

Our **remote control** with **dimming** and **on-off capabilities** is **NOW AVAILABLE**.

NEW!

DAY-NIGHT KIT

The unique **DAY-NIGHT KIT** gives your Redilight 24-hour capabilities by allowing you to choose between two power sources – solar and the grid. Use the sun's free energy through the day then continue to enjoy your Redilight by simply switching to the extra low voltage power supply at night.

ABOUT

Redilight's solar-powered skylight alternative is the energy-smart solution to brighten dark areas in the home or office.

Unlike traditional skylights, Redilight's innovative design overcomes the challenges of building structures, difficult rooflines and multi-level dwellings. Say goodbye to those large and unsightly roof penetrations which can often compromise the roof's integrity.

Simply mount the solar panel on the roof and run the interconnecting cable to the Redilight skyfixture

– IT'S THAT EASY!

HOW IT WORKS

The Redilight solar panel converts energy from the sun delivering extra low voltage to your Redilight skyfixture(s).

The light works on a sun-up-sun-down effect, with the brightness increasing as the sun rises during the day then decreasing as the sun sets.

Want more light? Redilight's optional Day-Night Kit allows the skyfixture to be switched between solar or extra low voltage grid power at any time for full powered light.

BEFORE

AFTER

FEATURES

Cost-effective: Solar power is a renewable source of free energy.

Economical: If more than one light is required then simply install a larger solar panel, no need for multiple holes in your roof.

Quality: Using only the highest of quality componentry coupled with industry leading warranties, Redilight delivers years of trouble free uninterrupted light.

KIT ARRANGEMENTS

A Redilight kit comes complete with a solar panel, mounting brackets, interconnecting cable plus your chosen skyfixture(s). Install a larger solar panel for future additional lights.
