

PROJECT DETIALS FORM

Date:

Summary of Project Requirements

In order to assess your project fully and recommend the most appropriate energy storage solution for your needs, we ask that you complete the following form, save it, and return it via email to a member of our team.

Please note that this data will be kept confidential and will not be disclosed for any purpose other than the assessment of your project. Should you require an NDA to be signed prior to disclosure of this information, please email a copy of your NDA to info@alberfield.com.au attention Harry.

Client detials.

Company name	
or Private enquiry	
Address	
Suburb	
Contact name	
Landline	
Mobile	
Email	

Site detials

Address	
Suburb	
State	
Site type	e.g. factory, farm, shop etc.

Existing site detials.

Current power supply type	
Grid	
Renewables	
Diesel	
Current base demand- kW	
Current peak demand - kW	
Daily demand profile	
Renewable's generation profile	
Recent electricity bill - \$	
Any additional information you feel may be relevant	

List the new site requirements.

Preferred power supply	
Solar PV	
Wind	
Grid + renewables	
Expected base demand kW	
Expected peak demand kW	
Expected storage kWh	
If solar PV required	
Approx. roof size M2	
or ground mounted	
ESS inside building	
ESS external to building	
Site drawings attached	

Depending on your storage requirement additional power supply may or will be required. We can provide that additional power supply to maximise the storage capability of the ESS.

The above information will allow a concept design to be developed with preliminary cost estimates. If these design and cost estimates are acceptable then a formal quotation for the supply and installation of power and storage will be provided.

Please save and then email this completed form to info@alberfield.com.au for action.
